PURONICS® BrightClear™

Pure Water Solutions ®

Concerned about Chloramine in your Water?

We have the Solution for Crystal Clear Water!

The Puronics® BrightClear™ is specifically designed to reduce the level of chloramine and chlorine in your municipal water supply. Chloramine is a combination of chlorine and ammonia used to disinfect municipal water. But, chloramine could have potential side effects for people and fish and is very corrosive to lead water lines and copper plumbing. With exclusive dual-phase filter media treatment process the BrightClear™ optimizes filtration of municipal water so your family can enjoy the benefits of great tasting crystal clear water.

Clearly refreshing water

Food tastes better

Healthier for pets

Better tasting beverages

PURONICS® BrightClear™

Pure Water Solutions®

Exclusive Dual-Phase Filtration

- Reduces chloramine

WATER GUYS

BrightClear™ is not a water softener and does not remove hardness from the water.

Contaminants or other substances which can be removed by the Puronics® BrightClear™ system are not necessarily in your water. Operational maintenance and replacement requirements are essential for the product to perform as advertised. Actual savings achieved are dependent on your particular spending habits and usage levels.
